SUBLIMATION

Why Sublimation

'The only Limitation
is your Imagination'

The advantage of sublimation printing is that
Any colour, gradient or design requirement
Can be achieved, all logos are included and
The results are permanent, providing a totally
Durable finish that will not fade
Or crack overtime.

When sublimation inks are heated and reach a temperature around 200°C they turn into a gaseous state and become more vibrant in colour. These colours then penetrate the polymer content of the fabric's substrate and become part of the substrate itself. The effect is rather like that of tattooing, providing an everlasting design, colour and clarity.

Select a design from our huge gallery of designs
And we will personalize them adding your own
colours patterns and logos to make them
Absolutely unique to you.

If our templates do not catch your eyes,
a member of our creative team will help
Create something that is quite
Dynamic to your liking.
